

Square High Velocity Metal Fan

Features

- Low power saving: reduce energy consumption and save electricity
- High-efficiency fan blades: formed in one step, running smoothly and efficiently.
- Durable Motor: Pure copper wire and double ball bearings for longer service life.
- Safety design: Advanced double-net structure, easy to repair and maintain.

Square High Velocity Metal Fan Designed to provide efficient ventilation and cooling solutions. Providing efficient air circulation and rapid heat dissipation can not only keep the indoor air fresh and improve comfort, but also reduce the risk of overheating of production equipment and extend the life of the equipment.
