

Three Layer Air Hepa Carbon Filters

Accessory — for compatible HRV / fresh-air units

Three-stage replacement filter: pre-filter + HEPA + activated carbon for fresh-air ventilation units.

Pre-filter blocks larger dust and debris; HEPA layer captures PM2.5, allergens and bacteria; activated carbon removes odour and formaldehyde.
Magnetic frame makes filter changes quick and tool-free.

Filter Configuration

Item	Published value	Buyer check
Filter layers	Pre-filter / HEPA filter / activated carbon filter	Confirm compatible unit and required airflow before order.
Pre-filter function	filters particles such as mold and spores	Confirm filter fit and replacement requirements for the target unit.
HEPA function	filters dust, smoke and PM2.5 through high-density filter	Confirm the target unit and airflow resistance before selection.
Activated carbon function	helps eliminate indoor odor and formaldehyde	Confirm the air-treatment requirement and compatible unit before selection.
Use condition	confirm compatible unit and airflow resistance	buyer-side fit check

Ordering Notes

- Confirm the compatible unit and required airflow before ordering.
